

**IN THE CLAIMS:**

This listing of claims will replace all prior versions, and listings, of claims in the application:

Claim 3 has been amended and claims 12-13 have been added as follows:

**Listing of Claims:**

Claim 1 (original): A terminal device for transmitting and receiving mails, comprising:

a mail receiving unit;

a judging unit operable to judge whether a command declaration is included in a received mail;

a command interpreting unit operable to extract and interpret a specific command following the command declaration if the judgment of the judging unit is affirmative;

a creating unit operable to create, if the specific command is interpreted as target list creation, a list of corresponding targets in memory of the terminal device; and

a mail transmitting unit operable to create and transmit a mail having the created list as a mail main body and addressed to a requestor.

Claim 2 (original): The terminal device of Claim 1, further comprising:

a comparing unit operable to detect, if a password accompanies the command declaration and the judgment of the judging unit is affirmative, the password, and compare the password with a password owned by the terminal device; and

an authorizing unit operable to authorize the extraction and interpretation of the specific command if the passwords match each other.

Claim 3 (currently amended): The terminal device of ~~one of Claim 1 and Claim 2~~ Claim 1, wherein

the command declaration is a unique character string different from a mail text, and

the specific command is a line of code including a storage location of the targets, a type of the targets, and a process to be performed.

Claim 4 (original): The terminal device of Claim 3, wherein

the targets are received mails, transmitted mails, schedules of events, images, telephone numbers, received voice calls, or transmitted voice calls.

Claim 5 (original): The terminal device of Claim 1, wherein

if a specific command transmitted by the requestor after the requestor checks the list of the mail is a request of transmitting a specific item in the list, the specific item is read from the memory, and a mail having the read specific item as a mail main body and addressed to the requestor is created and transmitted.

Claim 6 (original): The terminal device of Claim 1, wherein  
if a specific command transmitted by the requestor after the requestor checks the list of  
the mail is a request of deleting a specific item in the list, the specific item is deleted from the  
memory.

Claim 7 (original): The terminal device of Claim 6, wherein  
a mail having a main body which indicates completion of the deletion and addressed to the  
requestor is created and transmitted.

Claim 8 (original): The terminal device of Claim 1, wherein  
if the targets are received mails, at least a sender, a received date, and a subject are displayed  
in the list, with respect to each of the received mails.

Claim 9 (original): The terminal device of Claim 1, wherein  
if the targets are schedules of events, a date, a time, and an icon indicating a type of an event  
are displayed in the list, with respect to each of the schedules of events.

Claim 10 (original): The terminal device of Claim 1, wherein  
if the targets are images, a shooting date, a title, an address in which an image is stored are displayed  
in the list, with respect to each of the images.

Claim 11 (original): The terminal device of Claim 1, being a mobile phone.

Claim 12 (new): The terminal device of Claim 2, wherein  
the command declaration is a unique character string different from a mail text, and  
the specific command is a line of code including a storage location of the targets, a type of  
the targets, and a process to be performed.

Claim 13 (new): The terminal device of Claim 12, wherein  
the targets are received mails, transmitted mails, schedules of events, images, telephone  
numbers, received voice calls, or transmitted voice calls.
